

# WOODRUFF STATE ADOPTED KINGS

Hiram H. Steele.  
Renominated by the Republican Convention for District Attorney of Kings County.

Jacob Neu.  
Nominated in spite of strong opposition for Sheriff of Kings County by the Republican Convention.

## Despite the Opposition of Leader Buttling and Others, Jacob Neu Gets the Republican Nomination for Sheriff.

For District Attorney, Kings County, Hiram H. Steele.  
For Sheriff, Jacob Neu.  
For Register, Ex-Congressman James R. Howe.  
For County Clerk, Henry R. Mayette.  
For County Treasurer, Isaac H. Carey.  
Lieutenant-Governor Timothy L. Woodruff dominated the Kings County Republican Convention in Brooklyn yesterday. In spite of a revolt led by former Sheriff William J. Buttling, the Lieutenant-Governor's slate went through without a hitch. The ticket as nominated was the one agreed to at a conference of independent and regular Republicans at Mr. Woodruff's home on Friday night.

rank and file of the party was opposed to the nomination of Neu, but Woodruff put him on the slate because of his popularity with the voters. Neu's name was presented by E. D. Candee, of the Twelfth Assembly District, a resident of Mr. Woodruff's ward. Senator Henry Marshall nominated James Niblo, of the Twenty-third Ward. Ex-Sheriff Buttling got the floor and made a bitter attack on Neu. He referred to him as a renegade, who had been kicked out of the Democratic party. "He has been forced on the slate by the leaders," he said bitterly. "I suppose they think there's nothing for us to do but vote for them. I for one want to say my vote is my own. I second the nomination of James Niblo." John Russell, of the Thirteenth Ward, was nominated against the caucus candidate for County Clerk, but with Niblo, he was bowled over by an avalanche of votes. The nominations made by Mr. Woodruff were all finally made unanimous. Of the candidates selected by the convention, ex-Congressman Howe represents the Eastern District. He is a clothing merchant, with a store on Broadway. He is about sixty years old, a German, and a member of the South Third Street Presbyterian Church, and for two terms represented the Sixth District in Congress. Henry R. Mayette, candidate for County Clerk, is a lumber merchant and a resident of the Twenty-fifth Ward. He is credited with having a "big" and is said to be willing to contribute liberally. He was a former Low man. Jacob Neu is the present District Attorney of Kings County. He was a Low man, and because of his independent affiliations was appointed to his present office by Governor Roosevelt. Isaac H. Carey has independent leanings. He was an Alderman from the First Ward when Charles Scholten was Mayor. He is in the real estate business.

# PLATT TAKES UP SHERWOOD'S FIGHT

He Appeals to McKinley to Save the Deputy Appraiser.

Washington, Sept. 23.—Deputy Appraiser Sherwood, of New York, will not be removed from office if the influence of Senator Platt can prevent it. A row between Platt and Cornelius N. Bliss, Wakeman's opponent, is pending. Mr. Platt was in conference with the President this morning for more than an hour and went over the evidence submitted by the committee appointed by Secretary Gage to investigate the condition of affairs in the New York Custom House. His protest against making "a sacrifice" of Sherwood was vigorous. "I fall to see," said the Senator, "where in these appointments of the Secretary have made out any case against the deputy that does not, with equal force, apply to appraiser Wakeman himself. If the one is guilty, so is the other. If Wakeman is innocent, so is Sherwood. The whole thing looks like a persecution of Sherwood, but for what reason I cannot imagine."

## MARKS RECOVERS HIS PRIZE EATER.

Deserted from the Texas Because There Was No Free Pie Counter.

This branch of the Navy Department which attends to the feeding of the sailors was thrown into a condition of great alarm yesterday when the news reached it that Leon Michaels had been recaptured. Michaels was the greatest eater in the navy. When, at Santiago, the shots were flying around the battle ship Texas, on which he served, he stood at the gun, alternately putting a cartridge into a breech and a doughnut into his mouth. After the battle, when Captain Philip called the sailors off to address them, Michaels was eating a ham sandwich. At every meal he was the first man at the table and the last to leave. His life was "one grand sweet feed." Captain Philip watched him with alarm. When other visitors came aboard Michaels was poured out to them as a wonder, and whenever he got the chance he would eat for them, just for the credit of the navy. Uncle Sam gives his sailors an unlimited diet, but it was not enough for Michaels, who wanted lunch baskets hung on the masts and troughs full of crackers and cheese put around the ship at short intervals. "You can't get anything to eat on this ship," was his constant complaint, and his ship's surgeon told him that perhaps his loading capacity was not large enough and that an operation would be necessary. One of his mouth might be increased fifty percent. There is one point in that fellow Michaels' favor, Captain Philip once said. "You always know where to find him. All you have to do is go into the dining room."

## SYNDICATE BIDS FOR NEW BRUNSWICK GAS.

Vice-President Hobart is interested in a wealthy syndicate of capitalists which is negotiating for the purchase of the New Brunswick Gas Light Company. It is reported now that the deal was consummated yesterday and that the price paid was \$2,000,000.

# \$800,000,000 GOLD EDISON'S SECRET

Inventor Will Extract the Metal from Sand by Electricity.

TO BEGIN WORK SOON.

Plant to Be Erected in New Mexico, Where There is a Big Field of Low-Grade Ore.

"This is certainly the biggest thing I ever invented—this electric process for extracting gold from sand. Near Santa Fe, New Mexico, there is a region of one hundred square miles, containing gold worth \$800,000,000 that would have remained there had this process not been discovered."

That gold will now be taken out and added to the world's supply. There are large gold deposits elsewhere that the process will also make available.—Inventor Thomas A. Edison to a Journal reporter yesterday.

THE exclusive announcement in yesterday's Journal that Mr. Edison has completed his wonderful electric gold extractor is now supplemented by some further details given authoritatively by the great inventor himself.

Hidden in the waste lands of the South, west are tons upon tons of gold. Up to the present time this gold has had no value to man. Mr. Edison has now worked out a region without water, and the cost of getting one dollar's worth of gold from this land by former methods would have exceeded the value of the metal.

Can Get It All. The machinery which Edison has devised has been completed, and is ready for shipment to Santa Fe, where it will be erected and started. It is boxed up at the Edison works at Orange and surrounded by every safeguard of secrecy.

"I am the patentee of the process," said the inventor yesterday, "but my only interest in the victory which will follow the Edison process is my employment as its expert."

To expect to go to New Mexico with the machinery and to superintend the construction of the plant. We shall begin work almost at once.

At the start we shall produce \$10,000 worth of gold every day. There is \$800,000,000 worth of it there. The electric machinery will be used to extract the gold. There will be no transportation of the ore. We shall handle it all on the spot and merely ship the pure gold.

The process has been found to extract gold mining without water. It has been tested and found to all requirements. The gold ore is in sand, and the water is then three feet below the surface, and it extends downward in some localities for one hundred feet before bed rock is reached.

Took Him Two Years. Mr. Edison has done little else for two years besides perfecting his gold extractor.

So secretly did the work proceed that no information concerning what he was doing leaked out until the Journal published the news yesterday.

The publication caused a commotion among mining engineers. The hope that a process would be found by which to extract gold from the earth without use of water in large quantities has long been in the mind of every mining man. For the first time it is now a reality.

Heretofore the water supply question has been the pivot of all mining operations. Mr. Edison's gold extractor is a process somewhat similar to that which he uses at Edison, N. J., in getting iron from the ore by magnetism. Changes were shown in the iron extracting machinery to make it applicable to gold ore, and it was the making of these changes which caused the long delay in completing the process.

At his iron mines the inventor utilizes a grade of ore so low that it was looked upon as valueless. Enormous crushers seize upon pieces of rock sometimes weighing as much as five tons each and crush them as easily as a man can crush an egg shell. Then the crushed material is made to fall in a series of troughs, and a series of magnets. The metallic particles are deflected by the magnets into a receptacle provided for them, while the sand falls into another.

What the Process Is. There are three series of magnets, twelve inch, eight inch and four inch, and the crushed ore falls in front of each kind of magnet in succession. When it has passed through the entire process the resulting product carries a percentage of 98 per cent of iron.

Mr. Edison, when asked to explain his gold extracting process, said: "I would not think of setting up a big plant to work an ordinary vein of gold. Even a half-ton of gold, 40 feet deep and half a mile long, would not pay me. I want deposits two miles long and 800 feet wide."

He has figured out that a small profit can be made in gold ore that assays as low as \$125 per ton. One of as low a grade as that could not be mined profitably by any existing process except mine."

Mr. Edison estimates the cost of erecting one of his plants at \$1,000,000.

# GIRL STOWAWAY TRAVELS FOR LOVE.

Norwegian Beauty Is Held at the Barge Office.

CAME IN ON THE NORGE.

Her Sweetheart Sailed Eight Weeks Ago and His Fortune Is Not Made Yet.

Olivette Nelson is twenty years old. She has a lithe, graceful form, an oval face and a complexion like a ripe peach. Her eyes are large and blue, and in them is the fearless look of the Norse women. She has tawny yellow hair, made up in two long braids that are fastened in a coil at the back of her head. When she smiles two even rows of white teeth are displayed. She is as ignorant as a babe of the world and its ways.

She is the daughter of a Norwegian farmer, and, until a voyage which ended here yesterday, had never been three miles from home. She grew up in her simple surroundings content with life as the birds that sang in her father's orchard. On an adjoining farm lived her playmate, Andrew Guttormsson, whose father, too, is a farmer.

He is tall, muscular and twenty-one. They grew up together, this boy and girl, suiting each other's tears and gladness until there came a day when Andrew spoke of going to the New World. He would make his fortune, he said, and come back to claim her as his bride. They talked it over at the little stile between the two farms. Eight weeks ago Andrew sailed for New York. He wrote to his sister's home, at No. 215 Twenty-seventh street, South Brooklyn.

Her loneliness became unbearable when he was gone, and one night, after kissing her parents good-night, she packed a few articles into a valise and trudged away to the nearest railway station. She landed in Christiania in the morning with twelve dollars in her purse—not enough to pay her fare on the Falgoutta, which she had before sailing time she stole aboard and lay down in a steerage bunk. The vessel was fifty miles out at sea when she was noticed.

This she told to the Board of Inquiry yesterday in the beautiful Norwegian tongue, smiling a little as she told of outwitting the steamship people. They had treated her kindly on board, she said. The Board gravely considered and a telegram was sent to Andrew Guttormsson, who quickly responded. Surprise and joy shone in his eyes when he saw her. They were the two children in their unbounded delight at meeting again.

The youth confessed that he had not yet made his fortune. He had not even a cure for work and could not guarantee his sweetheart's support, but was ready to marry her at once. His sister would receive them until he could take care of her. He begged his sweetheart to be allowed to land. The Board told him to bring his sister, and the girl was detained meantime. They parted with many kisses and promises for a happy future.

## PRETTY BABES WIN PRIZES AT A FAIR.

Two of the Judges Were Men and One a Woman.

Laughing, smiling, crying, cooling babies were on public exhibition at the grand stand at the Westchester County Fair Grounds at White Plains yesterday at the annual baby show of the county. There were babies in pink and sky blue, white muslin and var-colored linens, and babies in long dresses, with nurses to care for them. Four prizes were offered, one for the best boy under one year and one for the best boy over one year. These prizes consisted of solid silver cups, inscribed with gold, and were presented to the best girl under one year and the best girl over one year.

The judges were Edward Kear, George Gregory and Mrs. Stuart. After many consultations they decided that the best girl under one year was Mabel Dorothy Whitaker, daughter of Mr. and Mrs. Robert Whitaker, White Plains, and the best girl over one year was Mildred Stevens, daughter of Mr. and Mrs. William Stevens, of Port Chester.

Benjamin McIntyre, son of Reuben W. McIntyre, of Mount Vernon, won the prize for being the prettiest boy under one year. He is a year old, and his father, a Mount Vernon lawyer, was pronounced the best boy over one year.

Schooner Given Up Comes to Port. New Haven, Conn., Sept. 23.—Given up as lost in the naval news bureau of the past fortnight, the three-masted schooner Herald, came into port yesterday. She was said to have been lost in the Gulf of Mexico, and was supposed to have been lost on the trip from Martinique to this city, reaching here for the delay of three weeks in the Gulf.

New Rubber Company Buys Land. The Milltown India Rubber Company, which was organized to fight the trust, purchased five acres of land for a factory site near New Brunswick, N. J., last evening, totally wrecking both engines, demolishing eight freight cars, badly wrenching two passenger coaches and injuring nearly a score of people.

Among those worst injured are Charles Bayne, of Templeton, engineer of the freight train, hit internally; M. H. Sloan, freight, who is badly hurt; and F. T. Turner, engineer of the passenger train. None of the injured will die.

The officials of the railroad explain the cause of the collision by saying that the engineer on the freight train forgot that the passenger train, the Emulation, had the right of way.

Devery Still Making Transfers. Chief Devery, of the Police Department, made the following transfers yesterday for consideration of the National Street Manufacturers' Association.

Street Workers. It was decided that the workers were not entitled to an advance at the time. With prices are being twenty-five per cent greater to-day than when the orders were accepted in July and August, the same advance will be delivered. It is believed, will adjust the scale as a material advance.

No Wage Advance for Iron Workers. Pittsburgh, Pa., Sept. 23.—At a conference of officials of the National Street Manufacturers' Association and the United Brotherhood of Carpenters and Joiners of America, it was decided that the workers were not entitled to an advance at the time.

Disabled Locomotive Blocks Traffic. Huntington, L. I., Sept. 23.—The breaking of a string on the electric drawing the 7:54 o'clock west-bound accommodation train delayed both that and the 8:00 a. m. train which followed it this morning. The accident occurred at the junction of the Long Island and the express track made the stops unusually late, and the express train made the stops unusually late.

# COBB WAS INSANE, DECLARES OSGOOD.

Talks of the Riding Master Who Committed Suicide.

PARTY IN COLORADO.

Mrs. McKibbin, Whose Name Was Drawn Into the Case, Seeks Seclusion.

Glenwood Springs, Col., Sept. 23.—J. Cleveland Osgood, Mrs. Shelgrim, Mrs. Bertha McKibbin and J. A. Keeler, vice-president of the Colorado Fuel & Iron Company, are now enjoying an outing at Redstone, a secluded place on the Crystal River, forty miles south and east from here.

The Mrs. McKibbin of the party is the woman at whose home, in Rye, N. Y., Arthur E. Cobb committed suicide recently. He was the son of an English baronet, and had been her guest for the summer. Cobb had loved her since she became his pupil at Durland's Riding Academy, where he was employed as an instructor.

Since his arrival in Colorado, Mr. Osgood has made a statement of the affair, in which he says: "I scarcely knew Mr. Cobb. I may have met him three or four times, but never really had any acquaintance with him. It is only charitable to suppose that the man was insane when he committed suicide, and that his letter and accusations were the imaginings of an insane mind."

"The ladies whose names he has brought into unenviable notoriety were never more or less than kind employers, whom he served in his capacity as riding master. His lunatic delusions against one of them resulted in a declaration from his discharge for good cause."

Placidity of Tammany Leaders. Official returns from the Twenty-third Assembly District give Thomas F. McArvey a majority of 714. He polled 1,046 votes, while Stillings received only 1,232. Isaac A. Hopper defeated Charles Weide in the Thirty-first Assembly District by a majority of 300. Hopper's vote was 1,627, while Weide got away with 1,327.

## A Common Trouble.

Thousands Suffer From It Without Knowing Its Real Character.

No trouble is more common or more misunderstood than nervous dyspepsia. People having it think that their nerves are to blame, are surprised that they are not cured by nerve medicines and Spring remedies; the real seat of mischief is lost sight of; the stomach is the organ to be looked after.

Nervous dyspepsia often do not have any pain whatever in the stomach, nor perhaps any of the usual symptoms of stomach weakness. Nervous dyspepsia shows itself not in the stomach so much as in nearly every other organ; in some cases the heart palpitates and is irregular; in others, the bowels are affected; in others, the bowels are troubled, with loss of flesh and appetite, with the accumulation of gas, sour risings and heartburn.

Mr. A. W. Sharper, of No. 61 Prospect st., Indianapolis, Ind., writes as follows: "A motive of pure gratitude prompts me to write these few lines regarding the new and valuable medicine, Stuart's Dyspepsia Tablets. I have been a sufferer from nervous dyspepsia for the last four years; have used various patent medicines and other remedies without any favorable result. They sometimes gave temporary relief until the effects of the medicine wore off. I attributed this to my sedentary habits, being a bookkeeper, with little physical exercise, but I am glad to state that the tablets have overcome all these obstacles, for I have gained in flesh, sleep better and am better in every way. The above is written not for notoriety, but is based on actual fact."

Respectfully yours, "A. W. Sharper, "61 Prospect st., Indianapolis, Ind."

It is safe to say that Stuart's Dyspepsia Tablets will cure any stomach weakness or disease except cancer of the stomach. They cure sour stomach, gas, loss of flesh and appetite, sleeplessness, palpitation, heartburn, constipation and headaches.

Send for valuable little book on stomach diseases by addressing Stuart Co., Marshall, Mich.

All druggists sell full sized packages at 50 cents.

# One Dollar a Month

Until September 30 all patients who have taken medicines or professional treatment from any source whatever, for any form of Stomach Disease, will be received at the Copeland offices and treated until cured at the rate of \$1 a month.

That's the text of it and the people know by years of experience how the Copeland practice lives up to the text of its preaching.

\$1 a month, all medicines and treatment included—and it means you—provided you are a sufferer from Dyspepsia, Catarrh of the Stomach or any form of gastric ailment.

Starting innovation—remarkable opportunity. Yes, But the Copeland practice has always led in startling innovations that were for the good of the people.

For ten years this vast and powerful organization has been bringing the cost of skillful and conscientious medical practice nearer and nearer the resources of the humblest purse.

Now, in illustrating the width of the field this practice covers, there is adopted, and there will be followed week after week in its application to different diseases this wonderful rate.

It is the climax of all that has been offered and given in the past. It is given with a hearty good will, a cordial spirit of helpfulness and sympathy with the sick and suffering.

Those who have tried everything for distressing disease of the Stomach and failed are the first to receive it, and gladly, indeed, will they welcome it. This probably includes you. If it does, remember—

Provided you apply at the Copeland offices before September 30, and bring with you card, physician's prescription, or any evidence that you have ever taken medicine or received treatment for stomach disorder—you will be treated until cured at the rate of \$1 a month. The offer means just what it says. There is nothing ambiguous about it. You can bring yourself and your \$1 to the Copeland offices, you can find out first and without paying anything what the cause of your trouble is. Then by paying your \$1 you can be treated until cured under the terms of this remarkable opportunity.

## THE HIGHEST MEDICAL SKILL KNOWN

UNDER \$1 THE LOWEST FEE EVER

## IN SOME CASES THERE IS WATERBRASH, OR HEARTBURN, WITH CONSTIPATION TO COMPLICATE MATTERS.

The old plan of doctoring for stomach troubles consisted in purges and emetics. Drugs that irritated or inflamed the stomach.

Drugs that increased the suffering rather than allayed it. Under the Copeland Treatment the inflamed and diseased lining of the stomach is first soothed and quieted by the use of proper remedies.

The sore and inflamed spots are healed, and the lining of the organ is restored to its wonted tone and healthy condition. Under this plan healing drugs quiet the sore and inflamed spots that have been throwing out quantities of sticky, slimy mucus that is mixed with the food and has coated it over, thus preventing the gastric juices from dissolving and digesting it.

When once healed the lining of the stomach is enabled to serve the purpose that nature intended it to serve. The hawking and spitting in the morning become less, the appetite for breakfast returns, there is no more nausea where there should be desire for food, the heartburn and waterbrash pass away, the bloating in the stomach after taking food gives place to the pleasant sense of fullness that accompanies the taking of a full meal.

The foul gases that were belched up are no longer formed, and the bowels become regular. The entire system experiences new vigor from the abundance of nourishment absorbed into the blood, where foul poisons had previously been offered it.

## The Copeland Medical Institute

DOCTOR W. H. COPELAND, Consulting Physician.  
DOCTOR E. E. GARDNER, Physician.

Offices, Corner 42d Street and Madison Avenue. Office Hours, Continuous Session, 9 A. M. to 8 P. M. Sundays, 10 A. M. to 3 P. M.

At Madame Swift's Beauty Emporium. BROADWAY, near 23d.

## ONE CARAT OPALS \$1.50

We want the readers of this paper to know us as well as the readers of other newspapers. We have out a paper and an Australian Fire Opals, and we are acquainted with a jeweler who can show the quality of our goods for twice the money.

THIS IS THE SIZE OF ONE CARAT OPAL. RENT ANYWHERE. CREDIT OF PRICE AND MONEY BACK IF NOT SATISFIED.

DESOLA MENDES CO., Cutters of Precious Stones. 51-53 MAITLAND, NEW YORK. HALF CARATS, 75c.

## ANTI CRAVE CURES DRINK HABIT

has cured more men of the liquor habit than all the institutions combined; cost to take: anti-craze medicine, sold by Hageman, 106 Broadway, Riker, 23d St.; Pond & Bore, 9th Ave. and 25th St.; Rockey, 3rd Ave. and 40th St.; Charles H. Hester, cor. Broad and Market sts., Newark; Holton's, Brooklyn; or mail for price, \$1. Address: GLOBE REMEDY CO., Room 21, 177 Broadway, N. Y.

## Dewey Butterflies.

Ladies should wear the EMBLEM OF MANILA on their hats during the Dewey celebration.

# THE WORLD IS A COMEDY TO THOSE THAT THINK A TRAGEDY TO THOSE WHO FEEL, AN APARADISE TO THOSE THAT DRINK JOHANN HOFF'S MALT EXTRACT

The Late Prof. D. Hayes Agnew Said to Mrs. Welch, wife of Dr. Welch, of Lancaster, Pa., as follows:—

"GET a case of the genuine Johann Hoff's Malt Extract, and use it freely and liberally. No small wineglass doses, but a good half tumbler full, or even more with every meal, and you will not have cause to regret it."

JOHANN HOFF'S MALT EXTRACT MAKES FLESH AND BLOOD
